Quarterly Considerations

Q3 2022

Disclosure

This report is intended for the exclusive use of clients or prospective clients of Apollon. The information contained herein is intended for the recipient, is confidential and may not be disseminated or distributed to any other person without the prior approval of Apollon. Any dissemination or distribution is strictly prohibited. Information has been obtained from a variety of sources believed to be reliable though not independently verified. Any forecasts represent future expectations and actual returns; volatilities and correlations will differ from forecasts. This report does not represent a specific investment recommendation. Please consult with your advisor, attorney and accountant, as appropriate, regarding specific advice. Past performance does not indicate future performance and there is a possibility of a loss.

Market Themes

1. The pace of the current rate hiking cycle is among the fastest we've experienced, as the Fed remains steadfast in its mission to combat inflation at the potential expense of slowing economic demand.
2. For much of the year, higher interest rates in the U.S., along with recent elevated concerns for growth stemming from Europe, have provided a tailwind for the U.S. dollar.
3. A host of macroeconomic factors – global inflation, tightening monetary policy, supply chain logistics – are contributing to slowing global demand. Uncertainty around economic growth has resulted in elevated market volatility which is likely to continue in the near term.

Foreign Currencies Weaker versus U.S. Dollar

Foreign exchange markets have been volatile this year and the U.S. dollar has shined relative to many major currencies. The British pound came under pressure late in September following the announcement of the new Prime Minister's tax cut agenda; the Bank of Japan also stepped in to help curb the decline of the yen.

Source: FactSet. Indexed to 100 = December 31, 2021. Relative to the U.S. dollar. As of September 30, 2022.

Federal Reserve Hiking Cycles

The Federal Reserve reaffirmed its commitment on fighting inflation at the September policy meeting by raising its policy rate an additional 75 bps and projected a more aggressive policy path compared to June.

Sources: FactSet, Federal Reserve. As of September 30, 2022.

Manufacturing PMI Shows Signs of Slowing

The Euro Zone and Emerging Market regions have moved into contraction territory based on purchasing managers indices. The U.S. remains resilient and saw a move higher in September, one factor contributing to demand for U.S. dollars.

Sources: FactSet, Market. As of September 30, 2022. A reading above 50 indicates expansion.

Economic Review

Labor Market Remains Resilient

The U.S. labor market remains strong, with both unemployment and jobless claims at pre-COVID levels, providing a solid foundation for the U.S. consumer and support for the broader economy.

Sources: FactSet, DOL. As of August 31, 2022.

Tightening Financial Conditions – 30-Year Mortgage Rates

Rates on 30-year fixed mortgages crossed six percent for the first time since 2008, resulting in mortgage payments that are over \$800 higher per month than the beginning of the year.

Sources: FactSet, Mortgage Bankers Association. As of September 23, 2022.

Leading Economic Indicator Index

The LEI moved into negative territory on a year-over-year basis, the first time since February 2021, indicating an elevated risk of recession.

Sources: FactSet, Conference Board, ECRI. As of August 31, 2022. Grey bars indicate recession period.

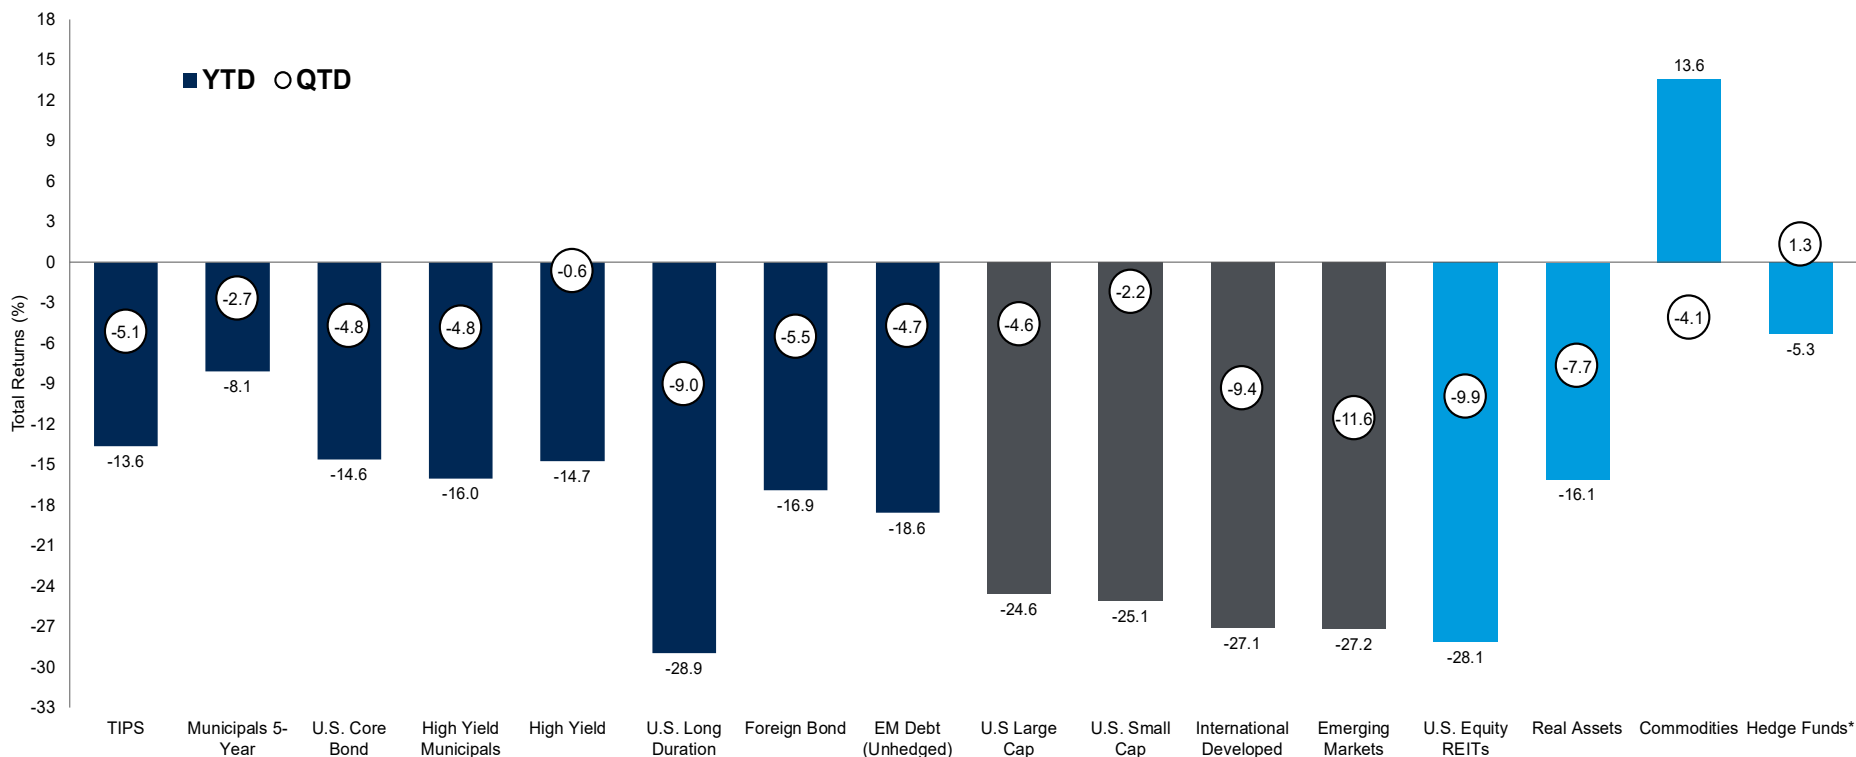

U.S. Inflation

Inflation remains elevated but has tapered from recent peaks. Energy and food continue to drive the headline number – the food component saw the largest year over year increase since May 1979.

Sources: FactSet, BLS. As of August 31, 2022.

Asset Class Returns

Source: Morningstar Direct. As of September 30, 2022. *Hedge fund returns as of August 31, 2022.

Fixed Income (3Q)

- Central banks grappled with dampening inflation and raised policy rates globally; interest rates moved higher as a result and bonds were broadly negative for the quarter.
- U.S. high yield held in relatively well, benefiting from a bull market rally early in the quarter but gave some back as concerns about the business cycle turning took hold in September.
- A strong U.S. dollar, as well as a spike in interest rates in the UK, pushed foreign debt lower for the quarter, trailing the U.S. market.

Equity (3Q)

- Investors continued to digest the impact of global inflation and a reduced outlook for economic growth sent risk assets lower, touching new 2022 lows in the quarter.
- U.S. equities outpaced their international counterparts as many see the U.S. positioned relatively better than non-U.S. regions. A strong U.S. dollar was an added headwind for non-U.S. equity markets.
- Diminished natural gas supply in Europe was a headwind for developed markets, while China was among the leading detractors within emerging markets.

Real Asset / Alternatives (3Q)

- Commodity markets took a step back in the third quarter on the back of slowing growth, improved supply, and the likelihood of reduced demand.
- REITs fell alongside the broader equity market in a risk-off move. Rising rates, falling home prices and reduced affordability contributed to the decline as well.
- + One of the few positive areas in the quarter, hedge funds have performed well YTD relative to both equities and fixed income and are earning their keep.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss.

Fixed Income Market Update

U.S. Treasury Yield Curve

The Fed raised its target rate by 75 basis points for the third time in a row as it aims to bring inflation back to more manageable levels. The yield curve remains inverted across many parts of the curve as short-dated rates shifted higher in response to the Fed's actions.

Source: FactSet. As of September 30, 2022.

Index Performance Attribution (3Q 2022)

A strong U.S. dollar was once again a headwind for foreign bonds, while fiscal policy in the U.K. drove yields significantly higher. High yield outpaced similar duration Treasuries despite a late quarter sell-off.

Source: FactSet. As of September 30, 2022.

Corporate Market Spreads – Trailing 5 Years

Point to point, credit spreads were little changed in the quarter as investment grade spreads were four basis points wider and high yield spreads were 17 basis points lower. Investors were remiss to rerate credit securities in similar fashion to the equity market as the prospects for recession grew.

Source: FactSet. As of September 30, 2022.

Equity Market Update

Equity Valuations (Trailing PE – Last 15 Years)

Falling equity prices pushed valuations lower across regions, a silver lining as entry points are now more attractive, especially abroad. It remains to be seen if earnings – the “E” in P/E – will follow suit, as analysts reduce their estimates.

Source: FactSet. As of September 30, 2022.

U.S. Equities – Return by Sector (3Q 2022)

Equity sectors were broadly negative, but energy and consumer discretionary were the lone positive standouts in the quarter. Energy is one of the few areas with positive EPS growth expected for the third quarter.

Source: Morningstar Direct. As of September 30, 2022.

Country Total Returns (%) – Top 10 Largest Economies

Global inflation continues to roil equity markets around the world, sending risk assets lower. Europe has come under pressure as of late as the energy crisis continues to unfold amidst restricted natural gas supplies from Russia and the impact it has on electricity prices, industrial production and household heat as we move into colder months. China's zero-COVID policy, weakness in the housing market, and supply disruptions have put negative pressure on the country's stock market.

Source: Morningstar Direct. As of September 30, 2022.

Real Assets Market Update

Commodity Performance

Commodity prices were generally weaker in the quarter as investors grew concerned that a slowing global economy will weaken demand for the assets. Energy remains the standout year-to-date as natural gas supply in Europe has been significantly reduced as a result of the Russia-Ukraine conflict.

Source: Morningstar Direct. As of September 30, 2022.

REIT Sector Performance

Real estate continues to come under pressure. A myriad of forces worked against the asset class – higher interest rates, a cooling housing market, and uncertainty as to what the office space landscape will look like in the future – resulting in negative price moves for REITs.

Source: Morningstar Direct. As of September 30, 2022.

Marketable Alternatives

Source: Morningstar Direct. As of August 31, 2022.

Fund of Funds / Asset Weighted (3Q)

+/- The HFRI Fund of Funds Composite was flat over the trailing 3-month period, keeping year-to-date returns in negative territory at -5.3%.

+ The HFRI Asset Weighted Composite was positive over the trailing 3-month period, bringing year-to-date returns to 2.7%.

+ While there has been significant dispersion across strategies, hedge funds have largely served their purpose this year in limiting drawdowns.

Equity Hedge / Event Driven (3Q)

- Equity hedge strategies detracted during the period, though still outperformed equities as many strategies reduced net leverage and added index-level shorts.

- Event driven strategies were the largest detractors during the period, led by activist and distressed restructuring strategies.

+ Merger arbitrage strategies were positive during the period and have now generated positive returns year-to-date.

Macro / Relative Value (3Q)

+ Macro strategies were positive over the period, adding to a strong year of performance as an abundance of political and economic activity has provided significant opportunity.

+ Relative value strategies were slightly positive over the period, led by volatility strategies.

- Corporate and sovereign fixed income strategies were the largest detractors.

Private Equity Market Update

U.S. Private Equity Deal Activity

U.S. Private Equity deal activity, while still high historically, moderated during the first half of the year relative to the frantic environment that consumed investors throughout 2021.

Source: Pitchbook. As of June 30, 2022.

Private Equity Performance (As of March 31, 2022)

Private equity performance was flat during the first quarter with US Growth and Venture modestly negative. Over the one-year and longer time periods, performance remains strong with dispersion between asset classes normalizing in recent quarters.

Benchmark	1-YR	3-YR	5-YR	10-Y	15-Y
US Private Equity	27.4%	26.6%	22.7%	17.9%	13.3%
US Buyout Index	27.1%	24.3%	21.0%	17.3%	12.6%
US Growth Equity Index	28.2%	33.8%	28.2%	20.3%	16.3%
US Venture Capital Index	26.6%	37.0%	28.0%	20.1%	14.6%
S&P 500 Index	15.6%	18.9%	16.0%	14.6%	10.3%

Source: Cambridge Associates. As of March 31, 2022. Returns presented as horizon pooled return, net of fees. S&P 500 Index as of March 31, 2022. Indices cannot be invested in directly.

U.S. Private Equity Fundraising Activity

The fundraising market continues to be competitive for both investors and fund managers. With more LPs nearing target allocations due, in part, to the denominator effect, many have had to assess commitment levels.

Source: Pitchbook. As of June 30, 2022.
